Purpose

Summary:

The purpose of this software is to get and organize content from major new websites and to display and organize this content as text for the user.

What Websites are the Articles Gathered from?:

Currently, the software gathers articles form a list of websites the user chooses.

How are the Articles Displayed?:

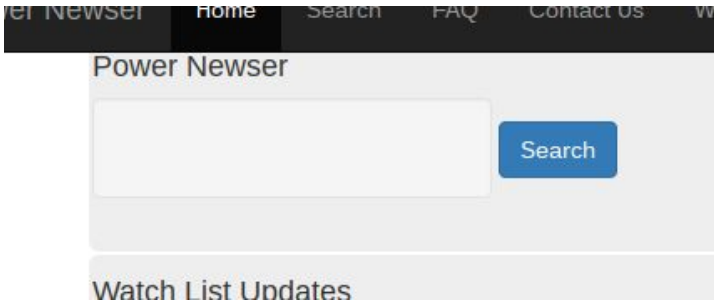
The articles are displayed by text underneath the search in the following format:

- link Name of Article – Date of Article … Beginning of Article

Searching

How Do I Search for a Topic?:

After you go to the website, you should see this:



To search for a subject, type a word or phrase into the text bar and click the button “Search”.

How do I go to an the Article Listed in the Results?:

To go to an article you find interesting, click the link of the article and you will be taken to the website where the article is written.

Here is an example: Suppose I search for “smart phone”. Here is a result:

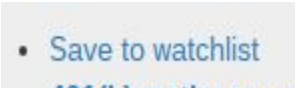
To go to the website and read the full article, you would click the blue underlined link and a new tab will open that will direct you to the website.

Watch List

This software allows users to added articles they like to a “watch list”. This list can be updated at any time.

How do I add articles to the watchlist:

To add articles to the watchlist, click “Save to Watchlist” above the article after searching:



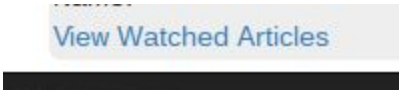
How do I view articles to the watchlist:

Watched articles will appear automatically when you open the webpage. There are listed under the heading “Watch List Updates”.

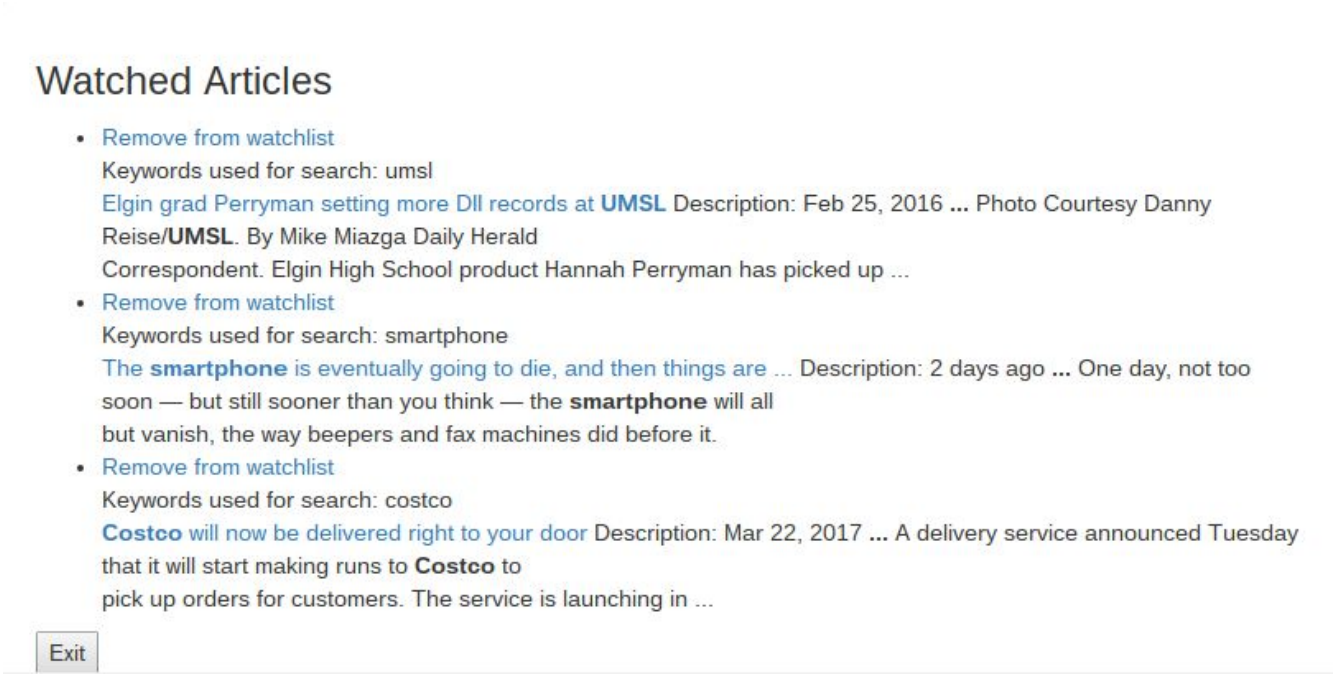
Removing articles from the watchlist:

To remove an article from the watchlist, do the following:

1 Click “View Watched Articles near the bottom of the page:



2 This popup window will appear:



3 Click “Remove from watchlist” above the article to want to remove.

4 Click the “Exit” button on the bottom of the popup.

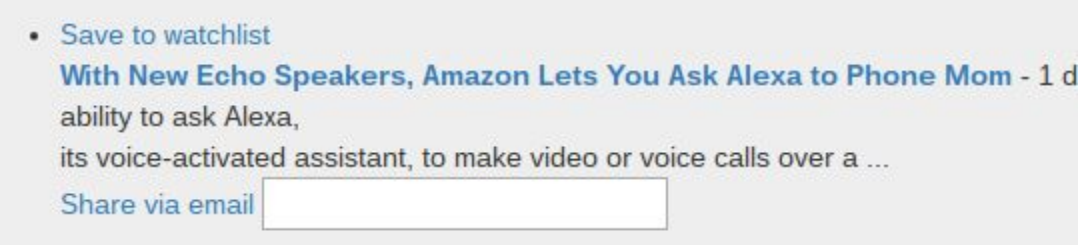
Sharing Articles

How to share articles:

After to search for a subject you can shared an articles in one of two ways: by email or by SMS.

How to share articles by email:

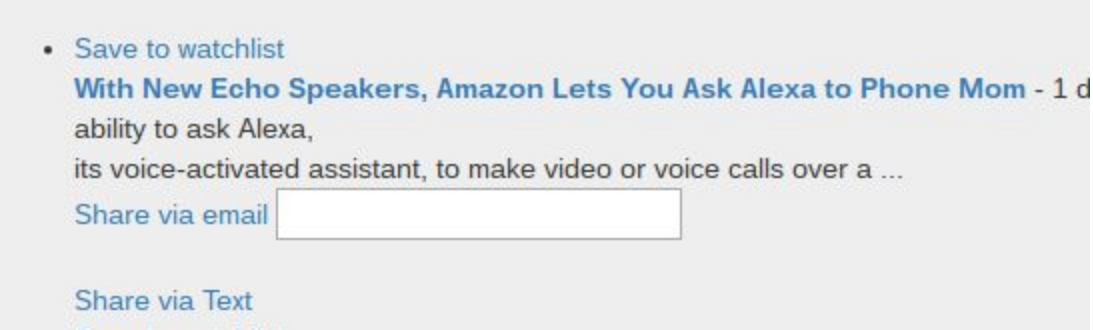
To share an article via email, first search for a subject. Suppose you search for "phone" and this is the result you want to share,



To share via email, enter the email address you want to share the article with in the textbox to right of "Share via email" and click "Share via email."

How to share articles by SMS:

Suppose you want to share the same result via SMS.



Under "Share via email" there is an option "Share via Text". Click this to share using SMS.
